

# GOLIATH 250/250+

## The worklight for all purposes and all conditions

### Quality Light

GOLIATH Worklights ensure a soft pleasant light. Made with Amalgam light GOLIATH Work Lights are the closest you can get to daylight.

In comparison, halogen lights emit a hard, concentrated ray of light that blinds the worker and casts dangerous shadows over the work area. Halogen lights cast deep shadows.

### Easy to Handle

GOLIATH Worklights do not heat up. You can move them around without burning your fingers and there are absolutely no fire hazards.

Halogen lights on the other hand, emit unpleasant heat and have been the cause of many disastrous fires.

### Long Durability

GOLIATH Worklights sturdy design guarantees light whenever the light is switched on - no nuisance, no trouble.

Tubes in halogen lights are sensitive to shock and other impacts, causing you irritation and extra costs every time a tube has to be replaced.

### Safety

GOLIATH Worklights have double insulation and are made of a non-conducting plastic material, preventing accidents to arise from loose connections in the light.

Halogen lights are made of metal and can be hazardous if damaged or if they have loose connections.

Part Number	Product Description	Watt	Weight	Dimensions
